21CS**Product/Service Information:**

Product families developed by 21CS experts lie in the areas of data and storage management, resiliency, analytics, and system and operational tools.

Since 1992, 21CS has been developing solutions for foundational disk and tape migration solutions, as well as providing migration services with thousands of successful migration engagements completed.

In June 2021, 21CS entered an Agreement to License z/VSE Operating System and Middleware Stack from IBM, releasing its first version of the operating system in 2022. 21CS is prepared to effectively maintain and improve upon the OS and middleware stack well into the future.

Activity: Software vendor

Specialist areas: System management, Data management, Storage management, Asset and change management, Cloud/mainframe modernization

Mainframe platforms supported: z/OS, VM/VSE

Non-mainframe platforms: Linux, Windows

Software pricing options: One-time charge, Monthly/annual license charge, Processor/capacity-based pricing, Workload/usage-based pricing

Address: 940 W Valley Rd Suite 1604 Wayne, PA 19087 USA

Phone: +1 800-555-6845

Email: info@21cs.com

Region: USA / Canada / South America

ABIS**About:**

ABIS Training & Consulting provides technological ICT services, mainly for large and medium-sized enterprises.

These services are based on specialized knowledge, which we wish to transfer to you, in the form of:

- Training & Coaching
- Consulting & Projects.

The scope of these services is based on:

- a high level of technical knowledge and expertise;
- a profound commercial and technological relationship with our customers.

Our services are available both in-person and remotely, as standardized packages or tailored to your specific needs.

Activity: Education/research

Specialist areas: System management, Data management, Programming/testing, Web integration and legacy reengineering tools

Mainframe platforms supported: z/OS, Linux on IBM Z

Non-mainframe platforms: Power Systems, AIX, Other Unix, Linux, Windows, Cloud

Address: Diestsevest 32/4B, 3000 Leuven, Belgium

Phone: +32-16-245610

Email: training@abis.be

Website: www.abis.be

Region: Europe / Middle East / Africa

Action Software GmbH**About:**

Action Software has been providing quality system's management and real time change management for over 40 years

eventACTION and ussACTION provide event/change tracking and control in the z/OS environment, thereby enhancing many areas of System's Management such as Security, Auditing, Change Management, Risk Management and Compliance with all existing regulations

Activities: Software Vendor

Specialist Areas: System management (including performance management, capacity planning, job scheduling, output management), Asset and change management, Security

Platforms supported: z/OS

Software Pricing: Monthly/annual license charge, Processor/capacity-based pricing

adesso Transformer Deutschland GmbH**About:**

adesso Transformer stands for economic and tailor-made application modernization of Mainframe Legacy Applications. The success of our approach is based on a hybrid modernization mix consisting of automatic code transformation, replacement by standard software, reengineering and replatforming. Our range of services includes consulting, conception and implementation of the best fitting migration and modernization strategy for the customer.

Product/Service Information:

We support your company in modernizing your legacy applications - from the first analysis to migration, implementation and maintenance. Together we select the best possible modernization option for your company. Our adesso Transformer Tool Suite enables us to transform your legacy applications fast and inexpensive into modern architectures and programming languages.

Activity: Systems integrator / VAR

Specialist areas: Web integration and legacy reengineering tools

Mainframe platforms supported: z/OS

Non-mainframe platforms: Linux

Advanced Software Products Group Inc (ASPG)

**About:**

Headquartered in Naples, Florida, Advanced Software Products Group, Inc. has provided the IT community with cutting-edge software solutions, support, and services since 1986. With a worldwide network of support, including active roles as an IBM Partner in Development and Microsoft Certified Partner, ASPG remains a leader in the optimization of data center performance. ASPG offers innovative software solutions for Data Security, Storage Administration, Capacity Planning, System Productivity, and CICS Productivity. Data centers worldwide have made ASPG software solutions their products of choice.

Product/Service Information:

- Mainframe Data Encryption [MegaCryption]
- IDMS Data Encryption [MegaCryption IDMS]
- IMS Data Encryption [MegaCryption IMS]
- Password Reset & Synchronization [ReACT]
- RACF Administration & Reporting [ERQ]
- DB2 Encryption [MegaCryption DB2]
- Cryptography Management [CryptoZ]
- SMF Data Management [SMFUTIL]
- ICF Catalog Management [CIM]
- On-line CICS Help [Help/Key]
- RACF Auditing & Reporting [ERA]
- User Provisioning [ProACT]
- Offline Access Recovery [OAR].

Applied Performance Technologies, Inc

About:

Applied Performance Technologies, Inc. is a 21st-century IT Capacity and Performance Management company offering solutions designed for busy, cost-conscious IT professionals who want maximum value and performance.

Product/Service Information:

PerfTechPro's zAnalytics® is a software solution to provide automated data collection, analysis, reporting and modeling. It is a Capacity Planning and Performance Measurement tool specifically designed for the cost conscious and savvy 21st Century data center. zAnalytics is the next evolution in Mainframe Capacity Planning tools.

Activity: Software vendor

Specialist areas: System management

Atos

About:

Atos is a global leader in digital transformation with 110,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high-performance computing, the Group provides tailored end-to-end solutions for all industries in 69 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea), listed on Euronext Paris.

The purpose of Atos is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.

Software pricing options available: Monthly/annual license charge, Processor/capacity-based pricing, Workload/usage-based pricing, Other

Black Hill Software**About:**

Black Hill Software is based in Australia and has been developing and selling the EasySMF family of tools since 2010.

Product/Service Information:

The EasySMF tools simplify and modernize SMF processing. The original EasySMF Windows Software provides a suite of SMF reports designed to help Systems Programmers manage z/OS systems and investigate problems.

Several Java based tools are also available. EasySMF:JE provides Java classes to map SMF records for custom or ad-hoc reporting. SMF records and reports can be converted to JSON for further processing by other tools. EasySMF:RTI connects to the z/OS SMF Real Time Interface and allows real time SMF reporting using Java. EasySMF:Events connects to the SMF Real Time Interface and forwards event data from SMF to Splunk.

The Java reporting tools can run on z/OS using zIIP processors, or on other Java platforms.

Activity: Software vendor

BMC**About:**

BMC helps customers run and reinvent their businesses with open, scalable and modular solutions to complex IT problems. BMC works with 86% of the Forbes Global 50 and partners around the world to create their future. Our history of innovation, industry-leading automation, operations and service management solutions combines with our unmatched flexibility to help organizations free up time and space to become an autonomous digital enterprise that conquers the opportunities ahead.

With BMC AMI, experience a transformation that not only automates but also simplifies mainframe management. Unlock the full potential of your mainframe by leveraging DevOps, AIOps, DataOps, and security. And by integrating generative AI, you can accelerate problem-solving and enhance decision-making. Automate workflows, ensure peak performance, and enhance agility with a dynamic, responsive, and future-ready platform designed for innovation and resilience.

Activities: Software Vendor

Broadcom Mainframe Software Division

About:

Broadcom Mainframe Software Division empowers enterprises to amplify the value of their Mainframe investments in ways that drive their business forward. Our market-leading DevOps, AIOps & Automation, Cybersecurity & Compliance, Data Management, and Foundational & Open Software solutions enable clients to adopt common tools using industry standards and integrate mainframe as part of their hybrid cloud. Our commitment to partnership extends beyond software, where we invest to deliver ever-greater value and capabilities, to Beyond Code programs that give customers the power to achieve greater business success with the platform.

Broadcom continuously invests in people, skills, and technologies to deliver continuous value to customers. Through the Beyond Code initiative, Broadcom partners with customers to ensure greater overall success is obtained from their mainframe investments. This approach includes programs that strengthen workforce resiliency, optimize operations, and drive better business outcomes through a wide range of no-cost programs tailored to support customers where and when they need it most—including flexible licensing, no-fee rationalization, expert knowledge sharing, white-glove support for critical change events, and more.

Operational Analytics & Management: Combine big data, machine learning and AI with mainframe expertise to deliver meaningful and actionable insights to augment and automate day-to-day operations and deliver exceptional customer experiences.

Automation: Reduce manual effort by enabling customers to proactively optimize resources and orchestrate automation across enterprise applications and systems.

Databases & Database Management: Store, organize, and manage mainframe data to ensure optimal performance, efficient administration, and reliability of critical systems.

Application Development & Testing: Attract the next generation of developers by offering a contemporary hybrid experience built on VS Code, Git, and CI/CD automation. Our open-first approach enables in-place modernization combined with adoption flexibility.

Cybersecurity and Compliance: Mainframes hold the most valuable information in the world, making them a lucrative target for everything from insider attacks to data theft. Ensure your strategy minimizes the risk and delivers the compliance you need for your most vital enterprise data and infrastructure. Manage and elevate mainframe access with modern practices such as multi-factor authentication and managing access for privileged users. Protect sensitive mainframe data to ensure compliance, continuously monitor for risk and proactively respond to bad actors.

Security Insights Platform: Ensure a trusted environment for customers and their employees by quickly interpreting and assessing mainframe security posture and developing remediation steps. **Security Insights Platform:** Ensure a trusted environment for customers and their employees by quickly interpreting and assessing mainframe security posture and developing remediation steps.

Bsecure - The Mainframe & Security Company

About:

Bsecure—The Mainframe & Security Company consultancy specializes in audit and security compliance in large business environments based on IBM z/OS mainframe infrastructures. It offers its Professional Solutions and Services in Spain, Portugal, and other European Community countries, as well as in Mexico, Peru, Ecuador, Argentina, Brazil, Chile, Uruguay, and Colombia.

Bsecure distributes DataPASS. A unique, worldwide service that continuously improves Compliance, Audit, and security in z/OS environments to comply in less than one month with the new European Union directives DORA and NIS2 for any Financial Institution! We are experts in ethical intrusion in Mainframe environments. The only company worldwide with an online training course to learn how to hack mainframes and how to avoid it.

Activity: Audit & Security services provider for Mainframe Infrastructure

Can Do Systems, Inc.

About:

Can Do Systems develops top-notch software products for IBM's z/OS operating system. The first Y2K software testing solution in the world, TICTOC, our date and time simulation product, was developed by Can Do back in 1992.

Can Do Systems' staff consists of people who have been in the z/OS, and MVS systems software development field for a combined total of more than fifty years. We've kept up with the times, though, and are committed to using the latest technologies to provide our customers with products that support the latest z/OS hardware and software."

Product/Service Information:

TICTOC for z/OS® and CICS® is date and time simulation software for IBM Z™. It helps software development teams ensure that their software performs as intended with virtual date and time testing. It may also be used to simulate multiple time zones and to trigger date and time sensitive applications in both test and production program environments. TICTOC's date and time simulation supports numerous IBM and vendor products, including DB2, LE, IMS, and many other software products.

Activity: Software vendor

Specialist areas: Programming/testing, Other

Cartagena Software Limited

About:

Founded in 1991, Cartagena Software develops and delivers targeted solutions to reduce risk and exploit new technologies, which are easy-to-use, flexible, and efficient. We continue the legacy of experience in storage (StorageTek), automation (Cybermation), and security (Rubin services). Cartagena is a member of IBM PartnerWorld, exhibits at SHARE, and participates in IBM's z Systems Technical Disclosure Meetings. We are partners with EMC, Fujitsu, IBM, and Oracle.

Service partners include Kofill (Asia), 4Bears and StorageD (Brazil), GlassHouse Systems and Eclipsys Solutions (Canada), Rubin (Germany), SoftPlex (Japan), Trident Services (USA).

Our head office is in the Greater Toronto Area, Canada.

Product/Service Information:

zTrustfer Cloud storage file transfer: Reduce storage costs with our new zTrustfer server running on z/OS, providing hardware-independent backup and restore using Cloud object storage. Interfaces include built-in web-server, and batch client. Backups are compressed and encrypted, and tracked using built-in SQL database management system or external MySQL. zTrustfer authenticates users and protects cloud credentials via SAF/RACF and secure certificates, not passwords. The server is multi-threaded, exploits zIIP, and provides graphical reports.

Prevent file damage with Immutable copies. Contact us for evolving capabilities!

Activity: Software vendor

Specialist areas: System management, Storage management, Security

CPT Global

About:

CPT Global is an independent IT consulting firm with a strong focus on mainframe and emerging technologies. For over 30 years, the company has helped 80% of the world's largest banks and many other Fortune 500 companies maximize their IT investments and enhance their mainframe capabilities.

Our consulting services span three main areas: Modernization, Optimization, and Assurance.

For enterprises that depend on mainframes, CPT Global leverages its specialist team to identify undiscovered savings, risks, and opportunities in our clients' mainframe technology to deliver a more cost-efficient, better-performing mainframe.

Product/Service Information:

CPT Global stands out from the competition through our tailored services and extensive expertise in Mainframe Modernization and Performance Tuning & Engineering.

For Mainframe Modernization, we offer a wide array of services. These include strategic advice, DevOps for mainframes, rationalizing licenses, upgrading legacy COBOL, migrating to the cloud, switching to alternative technologies, and providing off-mainframe testing environments. We focus on solving client challenges like increased digital transactions, resilience risks, and diminishing mainframe specialists.

What sets us apart is our global experience and strong partnerships with industry leaders. We've successfully served various industries worldwide, using our partnerships to deliver the best solutions to our clients.

In Performance Tuning & Engineering, we work to ensure systems perform at their best. We identify and fix system inefficiencies, make improvements, and monitor performance to ensure optimal operation.

We don't believe in one-size-fits-all solutions. Instead, we tailor our services to each client's specific needs. This personalized approach, combined with our deep mainframe knowledge, distinguishes us in the market.

Activity: Consultant

DataKinetics

About:

As the global leader in Mainframe Performance and Optimization Solutions, DataKinetics is relied upon by the world's largest banks, credit card, brokerage, insurance, healthcare, retail and telecommunication organizations to dramatically improve their mainframe data throughput and processing. Fortune 500 companies trust DataKinetics. With over 45 years of experience in the field of Mainframe Performance and Optimization, we continually help our clients leverage existing systems, resolving issues through optimization that hold them back, and enabling plans to propel them forward. Leveraging the experience and success of working with our global clients, we deliver proven solutions with worldwide success.

We continue to work with:

- • 3 of the top 5 global banks
- • 3 of the top 5 global credit card companies
- • 3 of the top 5 American property and casualty insurance companies
- • 2 of the top 5 American health insurance companies

Product/service information

This is pure high-performance in-memory technology for mainframes that can solve batch processing, throughput capacity, mobile traffic, resource usage, rules processing and other challenges IT organizations face in their mainframe datacenters. tableBASE accelerates Db2 applications, improves mainframe application performance, makes Db2 data more accessible, reduces CPU and MSU usage, and helps to reduce operational expense. All this without the need to make changes to your Db2 database or your application logic. Preparing for IBM's Tailored Fit Pricing (TFP): TFP brings cost certainty to mainframe shops interested in controlling their yearly mainframe spend. By first lowering your R4HA usage baseline with tableBASE, you can get the most out of TFP. Using tableBASE will lower the resource usage baseline—allowing you to benefit more from future growth pricing (which comes at a sharply reduced rate; much lower than your committed MSU rate). Combining tableBASE and TFP is a sure-fire way to control costs, and to find more capacity for your growing workloads.

DINO-Software Corporation

About:

Dino-Software Corporation (DINO) develops enterprise-wide solutions for the management, analysis, protection, and repair of complex z/OS mainframe environments. DINO has long been acknowledged for its superiority in ICF catalog management and technical support, helping organizations ensure their business-critical assets remain online and recoverable in a disaster. Their flagship product, T-REX, incorporates over two decades of experience gained from the original Softworks® developers who devised the Mechanic® and later Catalog Solution®, and it rapidly became the fastest-selling ICF catalog management and recovery tool ever released. This formula of producing superior products, at a reasonable cost, all backed up by first-class support from industry experts, has allowed DINO to enjoy unprecedented growth and rapidly establish DINO technology as the gold standard in enterprise-wide z/OS management solutions.

Product/service information:

T-REX is the fastest and most comprehensive ICF catalog management product available to analyze, diagnose, report, backup, repair, reorganize, recover, and assist with the overall maintenance and ensure continuous operational capabilities of the ICF catalog environment. T-REX prevents downtime, improves throughput, automates recovery & repair in record speed, REORGs catalogs while OPEN, and pays for itself with just one broken object. GUI optionally available.

Universal Data Manager (UDM) is a z/OS-based solution providing a consolidated global view via a GUI of the Enterprise storage environment, extending Automation, Auditing, Monitoring, Reporting and Control Functions of data and related storage objects with a mouse click. No distributed servers required. Simple and superior alternative to legacy tools such as CA Vantage, IBM Omegamon, BMC Mainview.

TERADON delivers Fast REPRO Mergecat for closed or open Datasets.

Activity: Software vendor

Specialist areas: System management; data management; storage management; other

Mainframe platforms supported: z/OS

Non-mainframe platforms: Windows

VELOCI-Raptor (VR) reduces application overhead by continuously and dynamically optimizing the VSAM batch buffering strategy, eliminating redundant requests and increasing throughput.

HSM Adminisaurus (HSA) is a consolidated management tool providing extensive reporting, fast & comprehensive auditing, in-depth processing analysis, and simplified administrative functions to help establish and maintain a healthy HSM environment.

XTINCT provides permanent DASD and Tape data erasure and meets federal and international regulatory requirements.

Realtime Defrag—24x7 nondisruptive DASD optimization for zOS & Db2—Defrag, Combine, Release without downtime.

Direct Computer Resources

About:

During a period where more people than ever are working from home, Direct Computer Resources' mainframe software products allow you to mask, edit, and manage your data safely, efficiently and affordably. DataVantage software products create production-like data for non-production uses such as DevOps, testing, analyses, and more. Data Masking functionality protects sensitive information enabling compliance with corporate policies and government regulations including GDPR, HIPAA, and CCPA (among others) while reducing the risks of data breaches.

Product/Service Information:

- DataVantage® for Db2 for z/OS & DataVantage® for IMS DataVantage® software for z/OS provides data management capabilities including browsing, editing and copying. Data masking functionality creates productionlike data for non-production uses such as DevOps, training, testing, and more, while enabling compliance with corporate policies and government privacy regulations.

Features:

- Data Masking protects sensitive information
- Logical compare highlights differences between two database tables
- Creates smaller test databases that reflect production conditions to explore multiple logic paths
- Provides easy before-and-after testing reports for internal audits
- Multiple reloads enable customization of test databases
- DataVantage for IMS 5.1 users get free upgrade to 7.2 with support

Activity: Software vendor

Specialist areas: Data management, Security

Mainframe platforms supported: z/OS

Software pricing options available: Monthly/annual license charge, Processor/capacity-based pricing

Address: 21 Valley Drive, Huntington Bay, NY 11743, USA

Website: www.datavantage.com

Region: USA / Canada / South America

- DataVantage® Data Masking Express™ is an affordable z/OS data masking-only software that creates production-like data for nonproduction uses, enabling compliance with corporate policies and government regulations. It runs alongside current data management software, and installs as an application program in less than four hours. A single installation can mask any one or all combinations of z/OS data such as Db2 or IMS, or Db2 plus IMS, VSAM, and Sequential files. Competitively-priced subscriptions are CPU-based regardless of processing capacity.

Features:

- Buy only data masking
- Affordable annual subscription with no upgrade fees
- Multiple data masking methods

DTS Software

About:

DTS Software is recognized worldwide as the leader in enterprise storage management software. Our integrated suite of software products helps our customers to monitor, manage, and control their storage subsystems. We specialize in storage software tools and solutions developed for the IBM z/OS, Hitachi VOS3, and Fujitsu MSP operating systems.

DTS Software provides superior function and features that allow managers and users to more effectively utilize their investment in storage systems. Our software is designed to solve many of the problems encountered by storage administrators and operations staff – allowing a limited number of administrators to manage a rapidly expanding storage environment. DTS Software was founded in 1991, is headquartered in Raleigh, North Carolina, and has more than a thousand customers in the US, Canada, Europe, and Asia.

Product/Service Information:

STORAGE is one of the fastest-growing items in most installations' budgets, yet a large percentage of this critical resource is often wasted. Inadequate standards enforcement, poor JCL practices, and system limitations often result in misdirected data and underutilized resources.

DTS Software's STORAGE CONTROL CENTER family of products is an integrated suite of storage management programs that allows users to get the most out of their storage dollars. The Storage Control Center products improve disk space utilization, prevent storage-related errors, allow installations to monitor the storage subsystem in real time, and proactively control the use of storage space.

Complete and total satisfaction is of paramount importance to us. All our efforts at DTS Software are driven by attentiveness to customer needs and responsiveness to the demands of the market. DTS Software is committed to providing products that will let you effectively and reliably manage your storage subsystem, now and well into the future.

Enterprise Systems Associates, Inc. (ESAi)

About:

Enterprise Systems Associates Inc. (ESAi) has tools for database productivity, enterprise-wide test data management, data masking, performance, audit and security for mainframe and distributed systems. Our mission is to help IT get the job done, efficiently, on-time and under budget. Thus maintaining service-level agreements and realizing operational savings. Qualified database and IT staff resources are in short supply, and workloads are increasing. Our innovative solutions help you meet challenges through automation optimizing workloads, and reducing cost, machine and staff efforts. We distribute for European authors including SPR, UBShainer, GmbH. Contact us to learn about these quality solutions.

Product/Service Information:

DBARS™ access recording services for Db2® can record all accesses to the sensitive Db2 tables selected - read, write and data definition. The product provides database audit and protection (DAP) and database activity monitoring (DAM) in one solution. DBARS unique intercept technology does not depend on Db2 tracing or log records. Efficient, flexible recording and auditing is now possible with optional alerting and blocking to protect against corporate data breaches.

XDM™ is an enterprise-wide Test Data Management (TDM) tool that enables staff to find and order the data that fits their needs, manage data across different environments and automatically deliver data where it's needed. This comprehensive TDM solution facilitates data refresh, PII data masking/encryption, cloning and highly efficient data provisioning. It supports Db2 LUW, Oracle, MS-SQL, PostgreSQL, Db2 z/OS, VSAM, IMS, Cloud, DevOps and more. The XDM suite enables developers, DBAs, test/QA and general IT staff to tackle daily challenges with flexible, repeatable, error-free processes.

BCV5™ is a high speed copy/migrate/clone tool that automates copies/refreshes of Db2 z/OS® objects and environments. This highly regarded product delivers source to target refreshes in a fraction of the effort, time and CPU required by other solutions. The Masking Tool™ option adds powerful masking of sensitive data during the copy or simply mask in-place. Get fast, repeatable, error free migrations and refreshes with BCV5.

BCV4™ is a leading Db2® and/or IMS® subsystem cloning tool that reduces cloning from hours/days down to minutes. Db2, SAP and PeopleSoft users can have clones and system copies in record time.

BPA4DB2™ is a buffer pool tuning product that replaces old, dated vendor solutions with a new level of expert analysis. It identifies, recommends, and performs ongoing monitoring and health alerts to ensure optimum performance of your Db2 systems. BPA4DB2 saves on staff tuning efforts and transferring volumes of trace data required by other solutions.

SQLQC™ easily identifies, analyzes and provides automated alerts on problem SQL from mainframe or distributed systems. It offers actions for improvements, simulation and overall performance advice. SQLQC's quality control technology helps shops with increasingly complex workloads maintain performance and service levels.

ULT4DB2™ is a log tracker/analyzer for Db2 answers the question "Why is a good, reasonably priced log analyzer so hard to find?" Functions include Undo/Redo, identify, and data propagate. A faster, better, more economical alternative.

ICPU™ gives programmers the ability to easily identify code causing CICS® application performance problems. Its very low overhead allows use in production or test environments.

Activity: Software vendor, distributor

Specialist areas: System performance, test data management, sensitive data masking, database auditing and protection as well as automated Db2 cloning and data provisioning

Mainframe platforms supported: z/OS, VM/VSE, Linux on Z

Non-mainframe platforms: Unix, Linux, Windows, Cloud

Pricing options: One-time charge, monthly/annual license, processor/capacity-based, workload/usage based

Address: 1340 Tuskawilla Rd, Suite 106, Winter Springs, FL 32708, USA

Enterprise Performance Strategies, Inc.

About:

Enterprise Performance Strategies, Inc. (EPS) has assisted hundreds of installations with their z/OS performance needs. Our services include z/OS performance education, consulting services, and our premier z/OS SMF performance reporting software; Pivotor®, created by Peter Enrico and Scott Chapman, who are well-known in the industry for their performance expertise. We specialize in extending our extensive knowledge to ensure that your workloads meet their performance objectives while resource usage is optimized. We also work to ensure your mainframe environment runs as efficiently as possible. Education is a pillar of our organization, so not only do we look forward to sharing our knowledge with other mainframers, but we have also embedded actual intelligence in our product. Our mission is to help organizations attain optimal mainframe performance.

Pivotor® z/OS Performance Reporting — In contrast to other z/OS reporting products, Pivotor® features built-in expert knowledge and actual intelligence to help optimize your environment.

Supported Analysis Areas:

- Workload Analysis
 - CICS, DB2, IMS, IDMS, MQ, WebSphere
 - Batch, File I/O
 - TCP/IP, zERT, z/OS Connect
- Resource Analysis
 - Processor, disk, storage
- MSUs Analysis
 - MLC R4HA, TFP
- Transient Analysis for high frequency data
- Much more

Some of Pivotor's intelligence features:

- Regular access to performance experts
- State-the-Art Outlier analysis
- Exception analysis
- Playlist analysis
- Long-term analysis with dynamic data aggregation
- Enhanced long/short-term reporting
- Custom reporting
- Drill down
- Dashboards

z/OS Performance Health Check® War Rooms — For insightful, cost-effective analysis that digs deep into the performance of your mainframe environments, this unique offering has greatly benefited dozens of clients.

z/OS Performance Workshops — Interactive performance workshops featuring topics such as general z/OS, WLM, CP, tuning, Parallel Sysplex, and much more. During the workshops, students work with their own data. Workshops are not just learning, but also a productive analysis of your environment.

z/OS Performance Webinars — EPS regularly hosts a series of free bi-weekly performance webinars, followed by a Q&A, that cover a wide range of z/OS performance and capacity planning topics. Webinars available for download.

Fischer International Corporation

About:

For more than 40 years, Fischer's vision for software development has been to provide innovative solutions designed to leverage and enhance the mainframe's place in the enterprise. Accelerate time to productivity with Fischer solutions for the mainframe. Interactive Output Facility (IOF), provides value with a strategic diagnostic ability and bottom-line problem resolution. Additionally, Fischer's strategic partnership with LogOn provides maintenance and support for various IBM products including QuickSelect for Db2 and Netview FTP.

Better IOF JES2 Management tools, better function.

Complete JES2 Management with a powerful toolset: IOF includes the ultimate job summary screen with online help on each display panel for easy access to better function. IOFSend, a popular tool, delivers batch job information in HTML form directly to a designated and authorized email. IOF training includes a functionality site available to access IOF tips and tricks with training videos. Very functional and user friendly, use commands from other JES2 management products to start using IOF with a minimal learning curve. IOF is the user's choice for JES2 management in many Fortune 500 data centers. Visit: www.FISC.com and click on the IOF button.

Through a partnership with LogOn Software, Fischer offers QuickSelect for Db2 for plug and play performance gains, no JCL or Db2 changes required. Minimize static SQL: Email: information@fischerinternational.com to learn of all the IBM products maintained and supported through our partnership.

Enterprise Software:

The principles of Zero Trust are the foundation for Fischer's full suite identity solution. When you can control all aspects of identity, you will have a more secure business. We offer automated provisioning, identity governance, password management, and access management. Request a demo at www.FischerIdentity.co

Fujitsu Germany GmbH

About:

Fujitsu in Germany, Austria and Switzerland

Fujitsu is a leading full-service information and telecommunications provider that supports its customers in all aspects of digital transformation. The company combines IT services and products with future-oriented digital technologies - such as artificial intelligence (AI), the Internet of Things (IoT), Analytics, Digital Annealing, Container Technology as well as Multicloud-, SAP-, ServiceNow- and Security-Solutions - and creates new values together with its customers and partners. The range of products and services can be tailored to individual needs - from conception to implementation, operation, and orchestration of digital ecosystems. In Germany, Austria and Switzerland, Fujitsu has more than 4,000 employees and has with over 10,000 channel partners in these three countries one of the most powerful partner networks in the industry.

Product/Service Information:

The BS2000 SE Infrastructure combines standard mainframe technology with the technology of the open world. This makes the SE Series the optimal platform for running business-critical applications both on /390 and x86 technology. Customers can select the ideal platform for each application and will thus get the most out of their mainframe investments. With its comprehensive set of functions, the BS2000 mainframe operating system provides the best possible support for existing and new IT infrastructures, enabling the integration of latest technologies, as e.g. Cloud Computing, AI, Edge Computing, Blockchain and DCMA. With its open interfaces it offers future-proof integration into modern application architectures. The extensive scalability of the BS2000 platform reaches into the very highest performance bands. BS2000 services offer uncompromising availability

and operational security for BS2000 systems with utmost profitability and cost transparency. Your IT infrastructure is designed more efficiently and becomes more sustainable for the future as we design and implement intelligent solutions in partnership with you. Fujitsu's Third-Party Mainframe Services is specialized in providing a Mainframe Managed Service offering positioned around the support of IBM Enterprise z and i platforms to customers across North West Europe and North America. We are a key provider in the provision of Third-Party IBM Mainframe Managed Services and provide end-to-end PaaS, in addition to tailored mainframe professional services designed around client TCO improvements.

We support customer requests for digital transformation!

IBA Group

About:

At IBA Group, we're revolutionizing mainframe development by seamlessly integrating DevOps and open-source technologies, including Zowe. With a robust partnership with IBM since 1993 and a dedicated team of over 250 experts, we specialize in delivering future-proof solutions compatible with modern IDEs. Our services encompass end-to-end application development, support, and cutting-edge Mainframe DevOps solutions, leveraging a comprehensive tech stack featuring Jenkins, Git, Docker, and the Zowe ecosystem. This approach not only enhances efficiency and agility but also accelerates the delivery of high-quality software solutions. Embracing these innovations, IBA Group is committed to maximizing the potential of mainframes, empowering teams, and shaping the future of mainframe development. Discover more at ibagroupit.com/services/mainframe.

Information Systems Asset Management, Inc.

About:

Founded in 1996, ISAM specializes in helping procurement, vendor management, and data center managers manage software expenses and license compliance risk. ISAM's GreenBook is the software industry's largest and most comprehensive database which contains more than 100 million software cost, product usage and categorization data points from over 900 software vendors across 1,000 data centers worldwide.

Armed with the knowledge of industry software benchmarks, GreenBook provides the backbone for numerous applications to guide data centers to best in class software licensing and costs.

Product/Service Information:

Interskill Learning

About:

Interskill is the mainframe industry's most delivered, most awarded, most IBM credentialed mainframe training! Interskill works closely with IBM, Broadcom, BMC and the industry's leading vendors to ensure our massive mainframe training resource covers the broad range of topics needed by the modern mainframe workforce. Interskill's mainframe training is so widely used that over 80% of all IBM digital credentials awarded globally for mainframe training are powered by Interskill training!

Product/Service Information:

Interskill's massive, mainframe training resource of over 400 online courses, videos, assessments, hands-on labs, coaching/mentoring tools, reporting and analytics, forms the low-cost, year-round, on-demand core of mainframe workforce training programs worldwide! IBM digital badges benchmark mainframe skills and drive mainframe personnel to seek and complete more training, delivering superior training ROI and optimal mainframe skills across all mainframe job roles! This is how the mainframe industry trains!

Macro 4 Limited

About:

With over fifty years' experience in mainframe software development, Macro 4 helps IBM mainframe users to:

- Deliver fast, seamless and secure web and mobile access to mainframe and non-mainframe applications
- Analyse and fix failures in mission-critical applications, quickly and efficiently
- Develop software troubleshoot problems and resolve program errors with unprecedented speed
- Create a secure testing and debugging environment using accurate test data
- Measure and report on application performance, quickly identifying opportunities for performance improvement
- Assure printing and digital delivery of business documents to support key business processes

Product/Service Information:

Macro 4 is a developer of software solutions that increase operational efficiency in IBM's mainframe environments and enable rapid modernization of mainframe applications and development processes. Today, these solutions are delivering significant cost savings as well as assuring the reliability of core applications in thousands of IT departments globally. Eclipse, browser and 3270 interfaces meet the access needs of every user.

Max Training ApS

About:

Skills and competencies are two of the biggest challenges Mainframe customers face, but based on experience, it doesn't need to be like that. Imagine if you could focus on business and growth. We created a modular solution for companies committed to solving their Skills and Competency Challenges. The solution's value lies in its results (reaching a specific goal within a specific time).

- Skills and Risk Management: Get insight into the past and current skills of Mainframers in the organization. Understand needs, redundancies, and gaps within your teams, departments, and the organization.
- Education: standard and customer courses. Remote-online or on-site. - Workshops: cover specific topics that are either customer specific or not covered by any course.
- Academies: to prepare a person or team for a specific role. Core z/OS (7 weeks); SysOp; SsProg (8 to 30+ weeks; Developer (Cobol, PL/1, Test Driven Development)

Activities: Skills, Education, Training, Academies, Risk Management

Specialist Areas: System management (including performance management, capacity planning, job scheduling, output management), Data management (including database performance and management), Storage management (including backup/recovery), Asset and change management, Security, Programming/testing, Web integration and legacy reengineering tools, Network performance/management, Cloud/mainframe modernization,

QMSI-Quintessential Mailing Software Incorporated

About:

QMSI's charter is to significantly reduce the cost of postal processing for mainframe mailers. QMSI software is exclusively IBM Mainframe. QMSI's principals, developers - and customers - are accessible to anyone who sees the value in - and wants to learn about - lowering CPU overhead, I/O resource utilization and overall processing time ... with the guarantee of saving money! Our customers will tell you "QMSI prices are not based on MIPS or MSUs and QMSI never increases costs for licensed CPUs; so there is no renegotiating - ever!" Adding a CPU is easy and inexpensive.

Armed with the knowledge of industry software benchmarks, GreenBook provides the backbone for numerous applications to guide data centers to best in class software licensing and costs.

Product/Service Information:

QCODE is the only modern USPS CASS-Certified software that takes full advantage of IBM's zSystem hardware and software. QCODE can run on a zIIP (eliminating IBM's MSU charges!) and QCODE's unique DataSpaceDataBase (DSDB) is a significant reason for QCODE's great performance. Placing your page data sets on SSD (Solid State DASD) devices, makes QCODE's performance "amazing!" All while utilizing less CPU and I/O resources, and running faster than all other CASS products. QSORT is the only single-purpose presort for First Class Mail (cards, letters and flats) that does not contain all the extra code and overhead found in other multi-purpose products. It's the perfect complement to QCODE and ready for the USPS Full Service requirements. QVIEW is a sub-second response time, online query tool for USPS Zip4 database look-ups. It is a complementary component of QCODE, and runs under CICS, IMS or CA's IDMS.

Together or individually, these products provide the most cost-effective, resource-efficient Postal Processing software available on IBM Mainframes. How is this possible? Because this entire software application suite was designed by system-level software architects.

QMOVE is coming soon!

Activity: Software vendor.

Rocket Software

About:

In today's rapidly evolving business landscape, the imperative to modernize is not just about staying relevant; it's about setting the best course for your enterprise, influencing your industry, and potentially reshaping global markets.?? Trusted by over 12,500 customers and 750 partners, and with more than 3,000 global employees, Rocket Software is the global technology leader and partner of choice that empowers the world's leading businesses on their modernization journeys, spanning core systems to the cloud. It enables small and large enterprises in many industries, including most of the Fortune 500, to maximize their data, systems, and infrastructure to deliver critical services that power our modern world. An authority in mainframe modernization, Rocket provides mainframe modernization tools and expertise that empower enterprises looking to modernize their applications without massive rewrites. Rocket Software boasts partnerships with the leading names in IT and mainframe, including IBM.

From day one, Rocket Software has been committed to developing and building tools to help organizations get more out of their mainframe investments and derive business value. Rocket Software supports and leverages their deep relationship with IBM to share expertise and guide customers achieving mainframe modernization through products including: Rocket@ Mainframe Application Testing and Debugging helps developers rapidly identify program problems and apply corrective solutions and test fixes. Rocket@ Mainframe Integrity Assessment Services provides a proactive approach to continuously ensuring mainframe integrity at the code. Services are designed to help users achieve compliance, both internal and external. Rocket@ Mainframe Security Services provides a comprehensive suite of mainframe security services to ensure adherence to industry regulations, Rocket@ Mainframe Compliance Assessment Services delivers a proactive approach to assessing mainframe compliance. Rocket Software is also committed to supporting the people and culture around IBM Z with its Z Center of Excellence. Comprised of IBM Z experts and IBM Champions, this group is dedicated to sharing Rocket Software's expertise, insights, and guidance for customers as they navigate the complexities that come with mainframe modernization.

RSH Consulting

About:

RSH Consulting, Inc. is a professional services firm established in 1992 and dedicated to helping clients strengthen their IBM z/OS mainframe cybersecurity by fully exploiting the capabilities and latest innovations in RACF. RSH staff is comprised entirely of exceptionally experienced technicians led by a recognized RACF expert. Our finely honed processes and extensive software toolset enable us to deliver the highest quality services efficiently and cost-effectively. For your next RACF project, contact RSH.

Product/Service Information:

RACF Security Reviews: RSH reviews pinpoint even the most obscure security exposures and identify opportunities for improving RACF administration and performance. We scrutinize all RACF controls to ensure critical system resources are protected. RSH looks beyond RACF to examine mainframe security policies, standards, and procedures, and to inspect RACF-interface configuration options in other system software. This holistic approach provides a more insightful picture of the overall mainframe security posture. Knowing your security exposures is essential to prioritizing remediation. **RACF Implementation Services:** RSH can tackle almost any RACF implementation, enhancement, or remediation task, whether large or

small and no matter how intricate. Our services are customized to meet specific client needs and budgets and range from occasional advisor to ad hoc assistance to complete hands-on implementation. RSH staff can work independently or as teammates alongside client staff. We provide clear explanations of what was done and why so that clients can properly maintain controls going forward. **RACF Training:** RSH is at the forefront of training the next generation of RACF administrators, technicians, and auditors. Our course series, ranging from basic administration to advanced technical topics, offers the ideal pathway for expanding your staff's RACF skills.

RSM Technology Ltd

About:

First founded in London in 1980 to serve the UK, RSM now provides its services worldwide, either directly or via selected partner organisations.

Product/Service Information:

RSM provides technical education and training via open-enrolment (public) courses and as exclusive, one-company presentations. These can be live, over the Internet via RSM's Virtual Classroom Environment service or on-site at customers' locations. RSM's courses are suitable for all personnel working in the IBM mainframe computing environment, including software developers/programmers, systems programmers, DBAs, operations personnel, and managers.

Activity: Technical education and training

Specialist areas: IBM Z systems mainframes, including z/OS and all its subsystems

Address: West Barn, Brightwell Farm, Brightwell Baldwin, Oxfordshire, OX49 5NP

Phone: +44 (0)1494 45 13 13

Email: courses@wdr.co.uk

SecuriTeam Software Ltd.**About:**

SecuriTeam Software is a software development company concentrates in IBM legacy system's security. Our aim is to develop a solution for each security vertical exist on these platforms. We started with Security assessment automations and documentation and will release an "on z"n code review product under our brand IronSphere.

Product/Service Information:

Our products are branded as IronSphere. Our flagship product is IronSphere Inspector. A solution to continuously monitor security controls on Z & I and perform DISA STIG based security assessments. The product can monitor hundreds of Lpars of any kind, since each agent installed on an Lpar reports to an on-prem virtual appliance. The end-user is using a browser to ao authenticate and access findings and documents. IronSphere Inspector is fully automated and is installed on some of the largest organizations in the world.

Activity: Software vendor

Specialist areas: Security

Mainframe platforms supported: z/OS, VM/VSE

Non-mainframe platforms supported: Power Systems, IBM i, i5/OS, and OS/400

Software pricing options: One-time charge, Other

Address: HaEshel St 1/Building B Caesarea, Israel

Phone: +972 52 2986404

Email: i_mugzach@securiteam.co.il

Software AG**About:**

Software AG helps you create effortlessly connected experiences for your customers, employees and partners with an enterprise iPaaS that integrates anything, anywhere, any way you want. By bringing together applications, data, B2B with APIs and events in the same AI-enabled integration platform, you can run a high-performing enterprise and constantly improve it based on data.

Get end-to-end visibility and governance across geographies, IT environments, and complex business ecosystems, with hybrid multi-cloud connectivity, and enterprise-grade security relied on by the most powerful banks, governments, and corporations in the world.

Trusted by the world's best brands for more than 50 years, Software AG is a pioneer in software innovation and understands the value of enterprise software. Businesses and governments around the world rely on mission-critical applications built on the Adabas & Natural development platform. Our proven application modernization capabilities can connect mainframe applications, data and people to the cloud, new technologies, channels, and services so you can build on your strengths and become part of a truly connected world.

Activity: Software vendor

Specialist areas: Data management, Storage management, Security, Programming/testing, Web integration and legacy reengineering tools, Cloud/mainframe modernization, Other

Mainframe platforms supported: z/OS, Linux on Z

Non-mainframe platforms supported: Linux, Cloud, Other

Software pricing options: Monthly/annual license charge, Processor/capacity-based pricing, Workload/usage-based pricing, Other

Address: Uhlandstrasse 12, 64297 Darmstadt, Germany

Phone: +49 6151 92 0 (Germany)

The Source Recovery Company Inc**About:**

Source Recovery started in 1994 when reverse engineering source from a load module was thought to be impossible. Over the past 29 years, we've recovered over 10,000 programs using our patented ReSource technology.

Product/Service Information:

We recover COBOL and Assembler source code directly from the mainframe executable. Our results are guaranteed to be 100% functionally equivalent to the original executable.

Activity: Software vendor

Specialist areas: Asset and change management, Programming/testing, Web integration and legacy reengineering tools, Cloud/mainframe modernization

Mainframe platforms supported: z/OS

Software pricing options: One-time charge

Address: 1070 Applecross Drive, Roswell, GA 30075 USA

Phone: 770.712.9887

Email: jrahm@source-recovery.com

Website: www.source-recovery.com

TONE Software Corporation

About:

Tone Software develops and markets business software to increase z/OS mainframe efficiency and modernize host operations, reduce z/OS support costs, and increase the productivity of z/OS IT teams responsible for critical business applications.

Based in Anaheim, California, TONE is a privately owned company that answers to customers, not shareholders. Leveraging more than 40 years of extensive mainframe expertise, TONE is committed to delivering quality z/OS software and exceptional support and service to every client.

TONE products are marketed and supported throughout North America, Europe, and Australia through the Anaheim headquarters and international agents. Tone's solutions include:

- OMC-FLASH JES2, JES3, and JES3plus SPOOL viewing and management
- JES2Mail, JES2FTP, Mail2ZOS and CICS2PDF z/OS output transformation and electronic delivery solutions
- OMC-PRINT and OMC-TCP/IP host VTAM and TCP/IP output routing and printing
- DYNA-STEP dynamic STEPLIB and ISPF library management
- TRX TSO resource and performance management

TONE's mainframe solutions modernize host operations, enabling users to manage and control the z/OS, TSO, JES2, JES3, JES3plus and VTAM infrastructure. Tone's solutions reduce system resource consumption, increase host productivity, and lower operational costs.

Activity: Software vendor

Specialist areas: System management

Mainframe platforms supported: z/OS

Software pricing options: One-time charge, monthly/annual license, processor/capacity-based, workload/usage-based

Non-mainframe platforms supported: Cloud

Pricing options: Monthly/annual license, processor/capacity-based, workload/usage-based

Trident Services

About:

Trident Services has provided z/OS solutions and systems consulting services since 1978. Trident has established a solid reputation for the excellence of its software and the expertise of its consulting staff while continuing to keep pace with industry changes, emerging technologies and client needs.

Our flagship software, zOSEM (zOperating System Environment Manager), is one solution for total system management of z/OS. Trident's zOSEM simplifies and modernizes z/OS management by implementing dynamic controls of functions, delivers improved system throughput, better control of JCL standards, optimizes HSM, and includes resource routing functions to significantly reduce ISV footprint, helping you reduce ISV and MLC charges. The latest release of zOSEM introduces step-level routing, which allows for further reduction of software license footprints by routing only the job step to a penalty box or LPAR.

Activities: Software Vendor

Specialist Areas: System management (including performance management, capacity planning, job scheduling, output management), Data management (including database performance and management), Storage management (including backup/recovery)

Mainframe platforms supported: z/OS

Software Pricing: One-time charge, Monthly/annual license charge, Processor/capacity-based pricing

Triton Consulting Ltd

About:

Triton Consulting is a highly focused, independent data management and digital transformation service provider. We're proud to be home to four IBM Gold Consultants, seven IBM Data and AI Champions, and some of the most highly qualified Db2 experts in the world. For over 25 years, we've been providing consultancy services, offering expert advice across all areas of information management. We deliver a broad range of high-level consultancy services, including senior project management, technical planning, technical architecture, performance tuning, and systems programming. We also offer services, from large-scale data migrations and tool replacements to the implementation of processes, tooling, and culture designed to speed up your application development and deployment life cycle—all to help your business drive change and transform services. Our services are available to clients worldwide.

Mainframe Consultancy Services

- Mainframe DevOps (Ansible, Jenkins, OpenShift)
- Db2 for z/OS Version Upgrades
- Cloud Migrations
- Db2 for z/OS Tool Replacement
- Mainframe Cost Management
- Data replication
- Database design and implementation
- Db2 system and application performance reporting, management and tuning

Z Mainframe Availability and Resiliency Service (ZMARS)

Our Z Mainframe Availability and Resiliency Service (ZMARS) is designed to enhance your Db2 server's resilience, ensure continuous application service availability, improve recovery speed, and boost overall system performance. We work closely with you to uncover potential vulnerabilities in your Db2 for z/OS environment. By focusing on your unique infrastructure and requirements, we ensure your systems are optimised for resilience and availability. The ZMARS service consists of multiple modules, giving you the flexibility to choose which ones to include or prioritize based on your specific needs.

- Database Backup and Recovery
- ZPARMS
- Software Maintenance
- Db2 for z/OS Single Points of Failure
- Disaster Recovery
- Workload Manager
- CICS Attach
- IMS Attach
- Automation
- Database Housekeeping
- Distributed Application Connectivity to Db2 for z/OS
- Db2 for z/OS Application Design and Quality Assurance
- Db2 System Application and Performance Monitoring

Activities: Consultant

Specialist Areas: System management (including performance management, capacity planning, job scheduling, output management), Data management (including database performance and management), Storage management (including backup/recovery), Asset and change management, Security, Programming/testing, Web integration and legacy reengineering tools, Cloud/mainframe modernization,

Mainframe platforms supported: z/OSVME/ VSELinux on IBM Z

Non-mainframe platforms supported: Power Systems, AIX/Other Unix/Linux/Windows/Cloud

Software Pricing: Monthly/annual license charge

Vertali

About:

Headquartered in the UK, Vertali provides expert IBM mainframe skills and resources to organizations around the world. We know IBM Z technology inside out, so you benefit from more experience, expertise, and insights than anyone else can offer. Working with world-leading organizations in finance, retail, utilities, governments, and 100% focused on IBM mainframe infrastructure, we help you secure and optimize your mainframe operations, reducing costs and increasing ROI.

Vertali offers:

- A large pool of IBM Z skills and resources
- Senior mainframe professionals vetted for their experience, integrity and communications skills

Vertali provides world-class mainframe infrastructure and security services plus software that help our clients around the world to navigate and profit from change, mitigate risk, and achieve their technology and business objectives. We help you to plan, deliver, maintain, and update your mainframe strategy.

Mainframe Consultancy Services:

- Mainframe Infrastructure Services
- Software Migrations
- Storage Migrations
- Capacity and Planning
- Project Delivery

Mainframe Support Services:

- Infrastructure Managed Services
- Extended Incident Support Services

Mainframe Security Services:

- Assessment/Audit Remediation
- Mainframe Penetration Testing
- Application Penetration Testing
- Product Penetration Testing
- Mainframe Security Assessment
- Security as a Service (Admin and/or Engineering)
- Cyber Resiliency (New Service for 2025)

Mainframe Software

- **Bespoke Mainframe Software Development:** offering clients bespoke mainframe software development services designing tailor-made mainframe solutions that fully align with your unique business requirements
- **zTrust:** easy-to-use browser-based mainframe software:
- **zTrust for Networks:** designed for network forensic analysis and network micro-segmentation
- **zTrust Password Synchronisation:** synchronises password changes across multiple Enterprise Security Management (ESM) systems in real time
- **zTrust for SMPe:** a security and compliance solution specifically designed to aid the management of mainframe software and subsystems

Activities: Consultant

Specialist areas: System management, Data management, Storage management, Asset and change management, Security, Programming/testing, Network performance/management

Mainframe platforms supported: z/OS

Virtel

About:

Virtel, a division of the SysperTec Group, is an independent software publisher founded in 1993 that develops, markets, and supports a comprehensive suite of System Z application modernization solutions. Virtel has more than 30 years' experience helping organizations modernize access, usability, and integration of legacy mainframe applications to improve productivity, save money, and simplify support. Virtel sells and supports its solutions directly from its headquarters outside Paris, through a US-based support team, and a small network of authorized resellers around the world.

Virtel Web Suite is a comprehensive and highly scalable set of System Z application enablement solutions to improve and extend the access, usability and integration of legacy 3270 mainframe applications. It is comprised of 3 solution sets that utilize the same underlying System Z centric Virtel protocol conversion technology.

- Virtel Web Access (VWA) securely serves 3270 screens as standard HTML5/JavaScript web pages over encrypted HTTPS connections. VWA replaces outdated TN3270 terminal emulators and expensive VTAM session managers to save organization money, simplify support and improve mainframe application security.
- Virtel Screen Redesigner (VSR) transforms 3270 application screens into modern web pages that produce a genuine web experience, without making any changes to the mainframe application. VSR is a no-code solution which overcomes issues earlier generations of 3270 web enablement tools experienced and is a simpler, faster and more cost-effective solution than redeveloping, replacing, or rehosting 3270 applications.
- Virtel Web Integration (VWI) creates highly scalable real-time connections to integrate CICS, IMS, TSO and other mainframe applications with server, web or Cloud applications. VWI exposes host transactions either through legacy 3270 screen UIs or screenless COMMAREA transactions

Activities: Software Vendor

Specialist Areas: Security, Web integration and legacy reengineering tools, Cloud/mainframe modernization,

Mainframe platforms supported: z/OSVM/VSE

Non-mainframe platforms supported: Power Systems, IBM i, i5/OS, and OS/400

Software Pricing: Monthly/annual license charge

VirtualZ

About:

VirtualZ is an innovative mainframe software company revolutionizing data access for AI, BI, modernization, and digital transformation. Our patented products—Lozen™, PropelZ™, and Zaac™—enable secure, real-time access to IBM Z data across hybrid cloud environments. We partner with leading technology providers like IBM, AWS, Google, and Snowflake, as well as consulting firms such as Accenture, Kyndryl and Mainline, to deliver seamless enterprise solutions. Our no-code software simplifies ETL, report migration, legacy tape modernization, and mainframe storage integration, reducing costs and accelerating digital initiatives. As the first and only women-founded, women-led mainframe ISV, VirtualZ is committed to driving innovation and diversity in enterprise computing. Our software empowers organizations to unlock the full potential of their mainframe investments while seamlessly integrating with modern cloud and analytics platforms.

VirtualZ delivers cutting-edge software solutions that transform how enterprises access and manage IBM Z data. Our product families—Lozen™, PropelZ™, and Zaac™—enable seamless, secure, and cost-effective data integration between mainframes and hybrid cloud environments without requiring data replication. Lozen™ provides real-time, read-write access to mainframe data from any platform, eliminating the need for complex ETL processes. It accelerates application modernization, AI/BI initiatives, and hybrid cloud strategies. PropelZ™ is a no-code data extraction and migration solution that simplifies report migration, SMF data archiving, and legacy tape modernization by seamlessly moving mainframe data to cloud-based analytics and storage platforms. Zaac™ redefines mainframe storage by enabling direct access to cloud and SAN storage, reducing on-premises storage costs while maintaining security and performance. Our professional services, in collaboration with partners like IBM, AWS, Google, Accenture, Kyndryl, and Snowflake, ensure smooth implementation and optimization for diverse enterprise use cases. VirtualZ solutions eliminate the need for traditional ETL, enhance data accessibility, and drive digital transformation, all while maintaining mainframe security and reliability. Whether for real-time analytics, storage modernization, or cloud integration, VirtualZ empowers organizations to maximize the value of their IBM Z investments.
